
Each marker = that group's average price gap

- ● Claude Haiku 5.5 (filled, dark = main model)
- ■ GPT-6 Luna (filled, dark = main model)
- △ Gemini 3.5 Flash-Lite (open, gray = exploratory)
- ◇ OLMo 3 7B (open, gray = exploratory)

Gemini and OLMo: Black and White names only, no budget arm

- Dark bar: 95% interval, main model
- Gray bar: 95% interval, exploratory model
- Dotted line at 0: no gap (same price as no-name buyer)
- Dashed, (a) only: ±1.4%, a size reference only. The smallest Black vs White gap Haiku's main test could detect, a different comparison. Not a cutoff for these markers
- Thin solid gray line: only separates race groups
