(a) GPT-6 Luna: Black vs White names
(b) GPT-6 Luna: women's vs men's names
Share of random splits (%)
Real gap
−1.80%
Real gap
−1.60%
Price gap, Black minus White names (%)
below 0 = Black names paid less
Price gap, women's minus men's names (%)
below 0 = women's names paid less
Gray bars: all 40 names shuffled into two random groups of 20 (10,000 shuffles)
Step line: one name group split into two random halves, 10 vs 10
(each group in turn, e.g. Black names alone, then White names alone; 2,000 splits)
Thick vertical line: real gap
